Mobile Solutions is proud to offer *all new* Smart Fill Templates!

Mobile Solutions – *your one stop shop for fabrication solutions* – is now proud to offer a variety of *Smart Fill Templates*. “Armed with our all new Smart Fill Templates, your installation staff can quickly and easily incorporate custom designs, the logo of your favorite brand, or the logo of the vehicle into any custom installation,” said Bryan Schmitt in regards. “Gone are the days of using a sticker over wood, sound deadening material or vinyl and then painstakingly cutting this out with a jig-saw or razor knife! Like all Mobile Solutions Smart Templates®, these Smart Fill Templates give exact and predictable results each and every time,” continued Schmitt.

Step 1: Spray a release agent to ensure filler won't stick to template.

Step 2: Apply body filler to inside openings - build filler over entire template.

Step 3: Sand surface of filler to expose detail in template.

Step 4: Remove template.

Step 5: Carefully sand the top of filler left on the panel.

Step 6: At this point, the panel can be covered with vinyl, etc.

Smart Fill Templates are made of 1/16” ABS plastic and laser cut for precision. Smart Fill Templates can also be reversed to have an Embossed or Debossed look! Simply apply body filler to the inside or outside shapes to achieve your custom panel. With proper use and care, Mobile Solutions’ Smart Fill templates will stand up to countless installations.

Currently, Mobile Solutions offers 15 different Smart Fill Templates at a price of \$24.99 each. If that wasn't enough, Mobile Solutions is also able to custom make templates to suit your needs – such as your shop logo. Pricing for a custom template is \$199.99, which includes a one-time set up fee and extra templates are \$24.99 each. Contact Mobile Solutions for more details.
